DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 3/11/09 have been fully considered but they are not persuasive as indicated below. The amendment made to claim 21 overcome the 35 USC 112, first paragraph rejection.

Claim Objections

2. Claims 21, 37, 51, 53, 55, 57 and 61 are objected to because of the following informalities: "pen" on line 5 of claim 21 should be --pen tip--. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 21, 37, 51, 53, 55, 57 and 59-61 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,065,215 (herein Otsuka) in view of Takanashi et al. (as discuss in the previous office action, hereinafter Takanashi) and Madaus et al. (as discuss in the previous office action, hereinafter Madaus) as set forth in the previous office action.

The Otsuka pent tip 24a does include a capillary material since it has a capillary force to draw ink from member 22 out onto the writing surface; however, the capillary mater of the pen tip is not capillary felt material. Since the ink guiding feed is a hollow

tubular body that guides the ink between where 24b and where 24 are pointing to (see Fig. 1), it does meet the limitation of the ink guiding feed lacking any capillary material since it is not made from capillary felt material. The ink guiding feed between where 24b and where 24 are pointing to (see Fig. 1) acts as a guide for the ink from member 22 to the pen tip where 24a is pointing at; therefore, the claimed limitation is met. The ink guiding feed is hollow because it has passage therein. Re: claim 61, to make the pen tip and the guiding feed out of two different members as claimed is met by the teaching of members 10 and 24 of Takanashi which would have been obvious to one of ordinary skill in the art at the time the invention was made.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
